## Cervical and fetal positioning examination simulator

Nr ref: SM01919

### Product information: Cervical and fetal positioning examination simulator

A multi-modular simulator designed to study cervical dilation and fetus assessment. In total, it consists of 15 separate modules in the form of square blocks.

### Description of individual modules:

- Hard and immature cervix.
- Partial puncture of the cervix, opening: 6 cm, fetal occipital position front right.
- Immature cervix, opening 5 cm, fetal or pelvic fetal position.
- Cervical collapse, 9 cm dilatation, fetal occipital posture.
- Cervical collapse, 7 cm dilatation, fetal right occipital position.
- Partial puncture of the cervix, 5 cm dilatation, buttocks position.
- Partial puncture of the cervix, 1 cm of dilatation.
- Wicking the cervix, 8 cm dilatation, head position.
- Immature cervix, 3 cm dilatation, prolapse of the umbilical cord.
- Hard and immature cervix, opening up to 2 cm, arrangement of head or occipital fossils.
- Cervical collapse, 8 cm dilatation, fetal occipital posture.
- Cervical folding, 9 cm dilatation, posterior occipital fetus.
- Immature cervix, 5 cm dilatation, falling out hand.
- Exfoliation of the cervix, 9 cm dilatation, asynclityism.
- Cervical dilatation, 8 cm dilatation, forehead of the fetus.

### Additional information:

- the possibility of adapting the model to the needs of a specific project. Please contact us or send us your specifications.
- the opportunity to purchase the entire set or individual modules
- individual modules are made of nedery and solid on an acrylic base

## Model for breast care and massage

Nr ref: SM01946

### Product information: Model for breast care and massage

Due to the use of various special synthetic materials, this model is extremely realistic in appearance, touch, flexibility and mobility.

### Application:

- Breast care and hygiene,
- Learning breast massage
- Education and support of women during lactation
- Demonstration of the use of the breast pump

### Additional information:

- Dimensions: 29 x 44 x 14 cm,
- Weight: 2.2 kg

## Internal Fetal Monitor Trainer

Nr ref: SM02017

### Product information: Internal Fetal Monitor Trainer

An ideal teaching tool, this lifelike, 3-D trainer provides realistic simulation for proper insertion of an internal electrode for fetal heart monitoring. The trainer includes a fetal head with palpable, realistic fontanels and suture lines, a lower uterine segment, and one cervical dilation model depicting 4 cm of dilation. Components fit into a durable plastic case that facilitates visualization and easy removal for cleaning. Dimensions: 14x13x21,5 cm

## Abdominal palpation model set

Nr ref: SM02016

### Product information: Abdominal palpation model set

The Abdominal Palpation Model includes a fetal model that flexes, facilitating all presentations and positions. Dimensions: 48 x 29 x 24 cm

#### The fetal model also features:

- A weighted body
- Movable limbs
- Firm buttocks
- A head with palpable anterior and posterior fontanel

The fetal model and the included pelvis model rest within the abdominal portion of the Abdominal Palpation Model. The abdomen is a padded cloth attached by Velcro to the base, which allows for easy removal and replacement of the fetal model to visualize and change fetal positions.

#### The model set also includes:

- A gel pad that creates a cushion over the fetal model and provides a realistic, lifelike feel
- 12 movable blue gel packs to simulate amniotic fluid
- A practice guide with suggestions for how to use the model
- A convenient carrying case

## Fetal Monitoring and Labor Progress Model Set

Nr ref: SM02018

### Product information: Fetal Monitoring and Labor Progress Model Set

The fetal monitoring and labor progress model set provides students with a realistic simulation of vaginal examinations, labor progress and insertion of the intrauterine pressure catheter. This fetal and labor model set is an excellent tool for teaching nursing, medical, or midwifery students. This lifelike 3D model includes:

- Fetal head
- Lower uterine segment
- Cervix
- 4 Interchangeable cervical dilation models (1,3,4,8cm)

The fetal monitoring and labor progress model set is a great addition to any lesson about the human birth process.
