

Disassemblable Canine Model

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: M01675

The **disassemblable canine model** comprises two halves, one of which shows the outside of the dog, depicting the fur and mucous membranes, while the other half of the model shows the dog without skin, exposing the muscles and tendons. The anatomical model can be taken apart, making the internal organs and spinal column visible. The internal organs can be removed from the body, and the rectum and bladder can be opened.

The disassemblable dog model is particularly suited as an informational object in alternative animal healthcare practices, veterinary clinics and in schools.

Removable Organs:

- Lung
- Heart
- Liver
- Stomach
- Bowel

More details:

- One half shows the fur, the other muscles and tendons
- Lungs, heart, liver, stomach, and bowel can be removed
- Rectum can be opened
- Hand painted
- Detailed bones and spinal cord
- Size (L x H x W): **40 x 33 x 15,5 cm**
- **Weight: 1,95 kg**

German Shepherd (female) model, 2/3 life size

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: MZ02532

A model of a female German Shepherd Dog made on a scale of about 2/3 of its natural dimensions. The model can be divided in the sagittal plane into two halves. One side of the model shows the animal's muscles in detail, while the other shows the hair. The whole is assembled on a base with wheels. The model can be divided into a total of 11 parts: lung, stomach (2 parts), heart (2 parts), left forelimb, tail, liver, intestines, 1 half (muscle), 1 half (outer part / hair)
