

Canine Airway Trainer (basic)

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: MZ02298

The phantom allows you to perform extremely faithful intubation and train the ability to supply the upper respiratory tract. Features the highly realistic anatomy of a dog's mouth and upper respiratory tract. It will allow students to experience realistic intubation sensations that take place in real situations.

Canine Airway Trainer (Deluxe)

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: MZ02299

The phantom allows you to perform extremely faithful intubation and train the ability to supply the upper respiratory tract. Features the highly realistic anatomy of a dog's mouth and upper respiratory tract. It will allow students to experience realistic intubation sensations that take place in real situations. Unlike the "basic version", this model additionally includes vascularized skin of the neck, realistic bifurcated trachea and lungs.
