

Apparatus for lymphatic drainage (pressure massage) 4-chamber - CarePump Compact4

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03500

CarePump COMPACT4 is an innovative device for intermittent pneumatic compression, intended for professional use in physiotherapeutic, cosmetology, biological regeneration and all types of rehabilitation facilities. Thanks to the intelligent function of the gradient, interval, hold, individual pressure settings for each chamber in the cuff and the ability to program your own treatment algorithms, COMPACT4 allows you to adjust the parameters to the needs of each patient.

CarePump Compact4 uses to rehabilitation rooms, hospital and sanatorium wards. The device has 6 therapeutic programs developed by the Polish Lymphological Society, dedicated to individual diseases, including lymphoedema, venous, fatty, etc.

CarePump COMPACT4 is a device with advanced settings enabling very precise and especially recommended for professional use. For home use, we recommend choosing a camera from the LITE series, more affordable and with basic settings, e.g. 6-chamber LITE6.

Intended use:

- physical treatment of post-traumatic conditions,
- prevention of circulatory and lymphatic system failure,
- diseases causing swelling,
- lymphatic insufficiency after mastectomy,
- feeling of "heavy legs",
- cellulite,
- exudates,
- prevention and prophylaxis in the treatment of obesity and overweight,
- past infectious diseases (in order to strengthen the body and remove toxins),
- accelerating the absorption of hematomas or bruises by stimulating microcirculation.

Technical data:

- Supported cuffs: 4-chamber
- Cuff type: overlapping, fishbone
- Pressure: 20-220mmHg
- Number of treatment programs: 6
- Treatment time: 1-120 minutes
- Possibility to turn off the chambers: YES
- Treatment rate adjustment: 1-5
- Display: 5" color touch screen
- Dimensions: 300x260x160mm
- Weight: 2.8 kg

Benefits of CarePump COMPACT4

- Actual cuff pressure measurement
- The device, as one of the few on the market, has the function of real pressure measurement in the cuff, thanks to which the pressure set on the device corresponds to the pressure on the patient's body, regardless of the size of the limb and the width of the cuff.
- Certificate of the Polish Lymphological Society
- The device is accredited by a medical organization associating specialists in the field of anticongestive therapy.
- Polish production and service
- Polish production of the camera, taking into account the needs of specialists at the device design stage. Service located in Krakow with quick handling of requests.
- 6 operating modes - treatment algorithms
- The device has 6 operating modes developed by the Polish Lymphological Society: a program dedicated to lymphatic edema, venous edema, fat, regeneration, prevention and relaxation, global massage.
- Precise parameter adjustment
- Very precise adjustment of parameters with an accuracy of 1 when setting pressure, treatment time, hold function, interval.
- Individual pressure for each chamber
- Possibility to set individual pressure in each chamber, including its shutdown.
- Smart gradient function
- The ability to set the gradient (pressure drop in the next pumped chamber) by a value expressed as a percentage or in mmHg or - after setting the initial and final pressure - automatic conversion of the gradient value.
- Programming your own algorithms
- Possibility to save up to 50 own programs, each of which can consist of 20 pumping cycles of different chambers.
- Facilitations for visually impaired and blind people
- Voice messages and the ability to start the treatment using only a special keyboard with directional signs. The device was developed in cooperation with the president of the Polish Association of the Blind - Sebastian Biały.
- Emergency air extraction from all chambers in the model
- It is possible to buy a safety button that allows emergency interruption of the procedure.

Kit Contents:

4-chamber COMPACT4 pressotherapy apparatus, power supply.

A wide range of cuffs:

To perform the procedure, it is necessary to buy additional cuffs for the part of the body on which the procedure will be performed:

- left leg cuff ,
- right leg cuff ,
- splitter (if you want to connect two cuffs to the device at the same time),
- wrist cuff ,
- short pants cuff ,
- cuff - belt for hips and belly .

Modes of operation

CarePump COMPACT4 has 6 different operating modes (treatment algorithms) dedicated to various diseases, which makes it easier to choose the right way to inflate the cuffs for a given patient. Therapeutic algorithms have been developed based on the experience and knowledge of experts from the Polish Lymphological Society. For each of the programs, you only need to enter the pressure value.

Dimensions of the cuffs for the lower limbs

- Thigh circumference (at the widest point) - 70 cm
- Thigh circumference (center) - 60 cm
- Knee circumference - 53 cm
- Calf circumference - 48 cm
- Ankle circumference - 44 cm
- Thigh - heel - 88 cm
- Thigh - metatarsus - 101 cm
- Toes - heel - 22.5 cm

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03503

CarePump LITE4 is a device that allows you to set basic parameters (pressure, treatment time, chamber filling rate, operating mode) especially recommended for home use. For professional use, we recommend choosing the Advanced series device, which offers a wider range of treatment settings and supports cuffs with a larger number of chambers, e.g. the 8-chamber CarePump EXPERT8 .

Intended use:

- physical treatment of post-traumatic conditions,
- prevention of circulatory and lymphatic system failure,
- diseases causing swelling,
- lymphatic insufficiency after mastectomy,
- feeling of "heavy legs",
- cellulite,
- exudates,

- prevention and prophylaxis in the treatment of obesity and overweight,
- past infectious diseases (in order to strengthen the body and remove toxins),
- accelerating the absorption of hematomas or bruises by stimulating microcirculation.

Technical data

- Supported cuffs: 4-chamber
- Cuff type: overlapping, fishbone
- Pressure: 20-220mmHg
- Number of treatment programs: 4
- Treatment time: 1-120 minutes
- Possibility to turn off the chambers: YES
- Treatment rate adjustment: 1-5
- Display: 5" color touch screen
- Dimensions: 300x260x160mm
- Weight: 2.8 kg

Advantages of the Lite4

- Actual cuff pressure measurement
- The device, as one of the few on the market, has the function of real pressure measurement in the cuff, thanks to which the pressure set on the device corresponds to the pressure on the patient's body, regardless of the size of the limb and the width of the cuff.
- Certificate of the Polish Lymphological Society
- The device is accredited by a medical organization associating specialists in the field of anticongestive therapy.
- Polish production and service
- Polish production of the camera, taking into account the needs of specialists at the device design stage. Service located in Krakow with quick handling of requests.
- 4 operating modes - treatment algorithms
- The device has 4 modes of operation (methods of cuff inflation) developed by the Polish Lymphological Society, including: lymphoedema, prophylaxis, global massage.
- Precise parameter adjustment
- The device allows very precise adjustment of parameters to 1 mmHg in the case of setting pressure, or 1 min in time settings.
- Possibility to turn off individual chambers
- A function that is particularly desirable in the case of certain diseases and injuries. It allows you to exclude any chamber from the procedure (no pumping).
- Overlapping cuffs
- A system of overlapping chambers has been used in the cuffs, which prevents the lymph from flowing back during the procedure, making it more effective.
- Low volume
- Quiet operation, conducive to relaxation, allowing you to talk freely or watch TV.
- Emergency air extraction from all chambers in the model
- It is possible to buy a safety button that allows emergency interruption of the procedure.

Kit Contents:

4-chamber LITE4 pressotherapy apparatus, power supply, 4-chamber cuff for the left leg, 4-chamber cuff for the right leg, a divider that allows two cuffs to be connected to the apparatus at the same time.

A wide range of cuffs:

Additionally, you can buy:

- wrist cuff ,
- short pants cuff ,
- cuff - belt for hips and belly .

Modes of operation

CarePump LITE4 has 4 different operating modes (methods of cuff inflation) dedicated to different diseases/indications. Therapeutic algorithms have been developed based on the experience and knowledge of experts from the Polish Lymphological Society. For each of the programs, you only need to enter the pressure value.

Dimensions of the cuffs for the lower limbs

Thigh circumference (at the widest point) - 70 cm
Thigh circumference (center) - 60 cm
Knee circumference - 53 cm
Calf circumference - 48 cm
Ankle circumference - 44 cm
Thigh - heel - 88 cm
Thigh - metatarsus - 101 cm
Toes - heel - 22.5 cm

Basic set for lymphatic drainage (compression massage) 6-chamber - Lite6 device

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03501

CarePump LITE6 is a device that allows you to set basic parameters (pressure, treatment time, chamber filling rate, operating mode) especially recommended for home use. For professional use, we recommend choosing the Advanced series device, which offers a wider range of treatment settings and supports cuffs with a larger number of chambers, e.g. the 8-chamber CarePump EXPERT8 .

Intended use:

- physical treatment of post-traumatic conditions,
- prevention of circulatory and lymphatic system failure,
- diseases causing swelling,
- lymphatic insufficiency after mastectomy,
- feeling of "heavy legs",
- cellulite,
- exudates,
- prevention and prophylaxis in the treatment of obesity and overweight,
- past infectious diseases (in order to strengthen the body and remove toxins),
- accelerating the absorption of hematomas or bruises by stimulating microcirculation.

Technical data

- Supported cuffs: 6-chamber
- Cuff type: overlapping, fishbone
- Pressure: 20-220mmHg
- Number of treatment programs: 6
- Treatment time: 1-120 minutes
- Possibility to turn off the chambers: YES
- Treatment rate adjustment: 1-5
- Display: 5" color touch screen
- Dimensions: 300x260x160mm
- Weight: 2.8 kg

Advantages of the Lite6 camera

- Actual cuff pressure measurement
- The device, as one of the few on the market, has the function of real pressure measurement in the cuff, thanks to which the pressure set on the device corresponds to the pressure on the patient's body, regardless of the size of the limb and the width of the cuff.
- Certificate of the Polish Lymphological Society
- The device is accredited by a medical organization associating specialists in the field of anticongestive

therapy.

- Polish production and service
- Polish production of the camera, taking into account the needs of specialists at the device design stage. Service located in Krakow with quick handling of requests.
- 6 operating modes - treatment algorithms
- The device has 6 operating modes (methods of cuff inflation) developed by the Polish Lymphological Society, including: fatty edema, regeneration, prophylaxis, lymphedema.
- Precise parameter adjustment
- The device allows very precise adjustment of parameters to 1 mmHg in the case of setting pressure, or 1 min in time settings.
- Possibility to turn off individual chambers
- A function that is particularly desirable in the case of certain diseases and injuries. It allows you to exclude any chamber from the procedure (no pumping).
- Overlapping cuffs
- A system of overlapping chambers has been used in the cuffs, which prevents the lymph from flowing back during the procedure, making it more effective.
- Low volume
- Quiet operation, conducive to relaxation, allowing you to talk freely or watch TV.
- Emergency air extraction from all chambers in the model
- It is possible to buy a safety button that allows emergency interruption of the procedure.

Kit Contents:

- 6-chamber LITE6,
- charger,
- 6-chamber left leg cuff,
- 6-chamber right leg cuff,
- air hose manifold (allowing two cuffs to be connected to the device at the same time).
- Camera operation:

Additionally, you can buy:

- 6-chamber wrist cuff
- 6-chamber hip and belly cuff
- Cuff - 6-chamber short pants
- Cuff - long pants, 6-chamber
- Double cuff for arms, shoulders and chest, 6-chamber
- Cuff for the left hand, shoulder, chest, 6-chamber
- Cuff for the right hand, shoulder, chest, 6-chamber

Modes of operation

CarePump LITE6 has 6 different operating modes (treatment algorithms) dedicated to various diseases/indications. Therapeutic algorithms have been developed based on the experience and knowledge of experts from the Polish Lymphological Society. For each of the programs, you only need to enter the pressure value.

Dimensions of the cuffs for the lower limbs

- Thigh circumference (at the widest point) - 70 cm

- Thigh circumference (center) - 59 cm
- Knee circumference - 52 cm
- Calf circumference - 48 cm
- Ankle circumference - 44 cm
- Thigh - heel - 88 cm
- Thigh - metatarsus - 101 cm
- Toes - heel - 22.5 cm

CarePump Move8, 8-chamber lymphatic drainage (compression massage) device

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03504

A modern, mobile device for lymphatic drainage

Battery powered, 5 operating modes, pressure up to 250 mmHg! The CarePump Move8 8-chamber lymphatic drainage device was designed for:

- athletes who want to achieve better results and require quick recovery before and after training;
- private users who appreciate the convenience of performing lymphatic drainage at home;
- mobile physiotherapists and those who mainly deal with sports physiotherapy;
- cosmetologists who use therapies in their offices that improve the quality of skin tissue and subcutaneous tissues and support the treatment of cellulite.

Move8 is a device that can be successfully equipped in a rehabilitation or beauty salon , but due to the battery power supply, its purpose is much wider.

Our CarePump series also includes 4-chamber and 6-chamber devices. The more chambers the apparatus supports, the more precise the lymphatic drainage treatment is, but at the same time the device is more expensive.

Cuffs for CarePump Move8

The CarePump Move8 comes with 2 lower limb cuffs. However, you can buy other cuffs that will work with the camera, intended for upper limbs, stomach and hips, as well as a cuff in the form of shorts, which we recommend primarily for body shaping, cellulite reduction and skin firming in the area of ??thighs, buttocks and hips .

- 8-chamber wrist cuff
- 8-chamber hip and belly cuff
- Cuff - short pants 8-chamber
- Cuff - long pants 8-chamber
- 8-chamber double cuff for arms, shoulders and chest
- Cuff for the right hand, shoulder and chest 8-chamber
- Cuff for the left hand, shoulder and chest 8-chamber

All CarePump devices support "fishbone" cuffs - the "overlapping" used in them (a system of overlapping chambers) prevents the backflow of fluids during the procedure, which makes it more effective.

Move8 camera - operating modes

The Move8 lymphatic drainage device supports 8-chamber cuffs and has as many as 5 operating modes .

The variety of operating modes prevents the tissue from getting used to the same stimulus, thanks to which treatments performed with the device do not lose their effectiveness with prolonged and intensive use.

The device is equipped with the option of switching off individual chambers , which is especially important in the case of some diseases/injuries.

Kit Contents:

- Lymphatic drainage device - 8-chamber CarePump Move8
- Cuffs for the lower limbs in a universal size (in black) - 2 pcs.
- Double air duct - 1 set
- Air line distributor
- Power cable
- Convenient transport bag.
- Features of the device
- The highest quality
- The highest quality 8 chambers in the cuffs
- 8 chambers in the cuffs 5 operating modes
- 5 operating modes Compact design
- Compact design Pressure regulation in the range of 30-250 mmHg
- Pressure regulation in the range of 30-250 mmHg Possibility to set the treatment time from 10-60 minutes
- Possibility to set the treatment time from 10-60 minutes Battery operated
- Battery powered Possibility to turn off individual chambers
- Possibility to turn off individual chambers Low volume
- Low volume

The treatment primarily facilitates the removal of excess fluid from the muscles, including the removal of metabolic metabolites, as well as inflammatory mediators (due to loads). Such action leads to relaxation of the tissues and reduction of possible ailments.

Lymphatic drainage supports the treatment of lymphedema - it serves to "push" the accumulated fluid and eliminate swelling by improving lymph circulation. The purpose of the massage is both to prevent the formation of stagnation and to help remove the resulting ones.

Indications for presotherapy treatments (lymphatic drainage):

- pre- and post-workout regeneration,
- prevention of circulatory and lymphatic system failure,
- diseases causing swelling,
- feeling of "heavy legs",
- cellulite,
- exudates,
- prevention and prophylaxis in the treatment of obesity and overweight,
- past infectious diseases (in order to strengthen the body and remove toxins),
- accelerating the absorption of hematomas or bruises by stimulating microcirculation.

Lymphatic drainage in the regeneration of athletes

Lymphatic drainage devices support the flow of blood and lymph, thanks to which they significantly accelerate regeneration. For this reason, they are willingly used by athletes before training or competing in order to achieve better results, as well as after exercise in order to regenerate (renew) faster and maximize training effects.

Lymphatic drainage is an indispensable element of regeneration at training camps and during the peak of the sports season, when the player has to keep fit for a longer period of time.

The Move4, Move6 and Move8 compression massage devices are ideal for athletes due to the fact that they have as many as 5 different operating modes and a large range of pressure regulation generated by the device. Battery

power allows you to perform the procedure anywhere, also outdoors or when returning from competitions.

Recommendations for working on the battery:

The battery included in the equipment of the device is a consumable element - the number of battery charges is not less than 500. We understand the charging cycle by connecting the charger to the device each time. To prolong the life of the battery, it is recommended to discharge it until the red indicator light comes on. Then complete the full charging cycle again.

Dimensions of the cuffs for the lower limbs

- Thigh circumference (at the widest point) - 70 cm
- Thigh circumference (center) - 59 cm
- Knee circumference - 52 cm
- Calf circumference - 48 cm
- Ankle circumference - 44 cm
- Thigh - heel - 87 cm
- Thigh - metatarsal - 102.5 cm
- Toes - heel - 22.5 cm

Apparatus for lymphatic drainage (compression massage) 8-chamber - CarePump Expert8

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03499

CarePump EXPERT8 is an innovative device for intermittent pneumatic compression, intended for professional use in physiotherapy, cosmetology, biological regeneration and all types of rehabilitation facilities. Thanks to the intelligent function of the gradient, interval, hold, individual pressure settings for each chamber in the cuff and the ability to program your own treatment algorithms, EXPERT8 allows you to adjust the parameters to the needs of each patient.

CarePump EXPERT8 applications

to rehabilitation rooms, hospital and sanatorium wards. The device has 13 therapeutic programs developed by the Polish Lymphological Society, dedicated to individual diseases, including lymphoedema, venous, fatty, etc. for beauty salons and spas, for treatments reducing cellulite and improving the quality of skin tissue, as well as after liposuction treatments. The device has a special program dedicated to cellulite reduction.

CarePump EXPERT8 is a device with advanced settings enabling very precise and especially recommended for professional use. For use at home, we recommend choosing a camera from the LITE series, more affordable and with basic settings, e.g. LITE6.

Intended use:

- physical treatment of post-traumatic conditions,
- prevention of circulatory and lymphatic system failure,
- diseases causing swelling,
- lymphatic insufficiency after mastectomy,
- feeling of "heavy legs",
- cellulite,
- exudates,
- prevention and prophylaxis in the treatment of obesity and overweight,
- past infectious diseases (in order to strengthen the body and remove toxins),
- accelerating the absorption of hematomas or bruises by stimulating microcirculation.
- Expert8 pressotherapy device

Technical data:

- Supported cuffs: 8-chamber
- Cuff type: overlapping, fishbone
- Pressure: 20-220mmHg
- Number of treatment programs: 1
- Treatment time: 1-120 minutes
- Possibility to turn off the chambers: YES
- Treatment rate adjustment: 1-5

- Display: 7" color touch screen
- Dimensions: 300x260x160mm
- Weight: 2.8 kg

Benefits of CarePump EXPERT8:

- Actual cuff pressure measurement
- The device, as one of the few on the market, has the function of real pressure measurement in the cuff, thanks to which the pressure set on the device corresponds to the pressure on the patient's body, regardless of the size of the limb and the width of the cuff.
- Certificate of the Polish Lymphological Society
- The device is accredited by a medical organization associating specialists in the field of anticongestive therapy.
- Polish production and service
- Polish production of the camera, taking into account the needs of specialists at the device design stage. Service located in Krakow with quick handling of requests.
- 13 operating modes - treatment algorithms
- The device has 13 operating modes developed by the Polish Lymphological Society: 4 programs dedicated to lymphatic edema, two programs for the treatment of venous and fatty edema, post-traumatic therapy, cellulite advanced, regeneration, prevention and relaxation, global massage.
- Precise parameter adjustment
- Very precise adjustment of parameters with an accuracy of 1 when setting pressure, treatment time, hold function, interval.
- Individual pressure for each chamber
- Possibility to set individual pressure in each chamber, including its shutdown.
- Smart gradient function
- The ability to set the gradient (pressure drop in the next pumped chamber) by a value expressed as a percentage or in mmHg or - after setting the initial and final pressure - automatic conversion of the gradient value.
- Programming your own algorithms
- Possibility to save up to 100 own programs, each of which can consist of 25 pumping cycles of different chambers.
- Facilitations for visually impaired and blind people
- Voice messages and the ability to start the treatment using only a special keyboard with directional signs. The device was developed in cooperation with the president of the Polish Association of the Blind - Sebastian Biały.
- Emergency air extraction from all chambers in the model
- It is possible to buy a safety button that allows emergency interruption of the procedure.
- CarePump EXPERT8 support

Kit Contents:

- 8-chamber EXPERT8 pressotherapy apparatus, power supply.
- A wide range of cuffs:
- To perform the procedure, it is necessary to buy a cuff for the part of the body on which the procedure will be performed. Optional:

- left leg cuff ,
- right leg cuff ,
- splitter (in case you want to connect two cuffs to the device at the same time)
- 8-chamber wrist cuff
- Cuff for hips and belly 8-chamber
- Cuff - 8-chamber short pants

- Cuff - 8-chamber long trousers
- 8-chamber double cuff for arms, shoulders and chest
- Cuff for the right arm, shoulder and chest 8-chamber
- 8-chamber left arm, shoulder and chest cuff
 - 8-chamber EXPERT8 pressotherapy apparatus
 - Modes of operation
 - CarePum

CarePump pressotherapy wedge - lower limb

Price: 0 EUR (~~0 EUR~~) + shipping cost

Product code: SR03548

Material Specification:

- Cover : material with a PVC coating for medical devices - easy to clean and disinfect:
- material compliant with the REACH regulation, certified STANDARD 100 by OEKO-TEX ®
- fireproof,
- resistant to physiological fluids (blood, urine, sweat) and alcohol,
- UV resistant, so it can also be used outdoors
- scratch resistant,
- oil resistant.
- Filling : medium-hard polyurethane foam with increased resistance to deformation:

HYGIENIC CERTIFICATE issued by the Institute of Maritime and Tropical Medicine in Gdynia, has the certificate STANDARD 100 by OEKO-TEX ® - product class I issued by the Textile Research Institute in Łódź, manufactured from high-quality raw materials that do not deplete the ozone layer.

The rehabilitation wedge is a medical device in accordance with the essential requirements for medical devices and within the meaning of the Act on medical devices, entered in the Register of Medical Devices kept by the Office for Registration of Medicinal Products, Medical Devices and Biocidal Products, equipped with the manufacturer's declaration of conformity and bearing the CE mark.

Cuff - long trousers, 6-chamber for CarePump series devices with air hose and manifold

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03521

Application of the cuff:

It enables the performance of mechanical lymphatic drainage (compression massage) in the area of legs, hips and in some cases the abdomen (depending on the height of the patient). Used in the treatment of edema, post-traumatic rehabilitation, post-workout regeneration, relaxation and in treatments aimed at improving skin firmness and eliminating cellulite.

Cuff compatible with CarePump LITE6 and MOVE6 .

Complete cuff, ready to connect to the device

The cuff includes: 6-chamber pants, an air tube and a double air tube divider that allows air to be inflated to both "legs" of the cuff at the same time.

Cuff - long trousers, 8-chamber for CarePump series devices with air hose and manifold

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03505

Application of the cuff:

It enables the performance of mechanical lymphatic drainage (compression massage) in the area of legs, hips and in some cases the abdomen (depending on the height of the patient). Used in the treatment of edema, post-traumatic rehabilitation, post-workout regeneration, relaxation and in treatments aimed at improving skin firmness and eliminating cellulite.

The cuff is compatible with CarePump EXPERT8 and MOVE8 .

Complete cuff, ready to connect to the device

The cuff includes: 8-chamber pants, an air tube and a double air tube divider that allows air to be inflated to both "legs" of the cuff at the same time.

Cuff - short pants, 4-chamber for CarePump series devices with an air tube

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03536

Cuff - short pants, 4-chamber set with an air hose, compatible with the following cameras: COMPACT4 , LITE4 , MOVE4 .

NEW on the market! Thanks to the use of a cuff in the form of short pants during the lymphatic drainage treatment, it is possible to comprehensively work in the area of ??thighs, buttocks and hips, which has a positive effect on firming, improving skin density, reducing cellulite, and shaping the body. The purchase of this cuff is recommended primarily for beauty salons, wellness, massage salons and SPA.

The cuff has a universal size. After filling with air, it adapts perfectly to the body.

The cuff is equipped with the "overlapping/fishbone" system - the chambers into which the cuffs are divided overlap each other, which prevents fluids from flowing back during the procedure, improving its efficiency.

Cuff dimensions:

For larger circumferences, it is possible to order a widener.

Cuff - short pants, 6-chamber for CarePump series devices with an air tube

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03522

Cuff - short pants, 6-chamber in a set with an air hose, compatible with LITE6 and MOVE6

NEW on the market! Thanks to the use of a cuff in the form of short pants during the lymphatic drainage treatment, it is possible to comprehensively operate in the area of thighs, buttocks and hips, which has a positive effect on firming, improving skin density, reducing cellulite, and shaping the body. The purchase of this cuff is recommended primarily for beauty salons, wellness, massage salons and SPA.

The cuff has a universal size. After filling with air, it adapts perfectly to the body.

The cuff is equipped with the "overlapping/fishbone" system - the chambers into which the cuffs are divided overlap each other, which prevents fluids from flowing back during the procedure, improving its efficiency.

Cuff dimensions:

For larger circumferences, it is possible to order a widener.

Cuff - short pants, 8-chamber for CarePump series devices with an air tube

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03506

Cuff - short pants, 8-chamber in a set with an air hose, compatible with EXPERT8 and MOVE8

NEW on the market! Thanks to the use of a cuff in the form of short pants during the lymphatic drainage treatment, it is possible to comprehensively operate in the area of thighs, buttocks and hips, which has a positive effect on firming, improving skin density, reducing cellulite, and shaping the body. The purchase of this cuff is recommended primarily for beauty salons, wellness, massage salons and SPA.

The cuff has a universal size. After filling with air, it adapts perfectly to the body.

The cuff is equipped with the "overlapping/fishbone" system - the chambers into which the cuffs are divided overlap, which prevents the backflow of fluids during the procedure, improving its effectiveness.

Hip and Abdominal Cuff, 4-chamber CarePump Series with Air Tube

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03537

Hip and belly cuff, 4-chamber in a set with an air hose, compatible with the following devices: COMPACT4 , LITE4 , MOVE4 .

The cuff has a universal size. After filling with air, it adapts perfectly to the body.

The cuff is equipped with the "overlapping/fishbone" system - the chambers into which the cuffs are divided overlap each other, which prevents fluids from flowing back during the procedure, improving its efficiency.

Hip and Abdominal Cuff, 6-chamber CarePump Series with Air Tube

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03523

Hip and belly cuff, 6-chamber with air hose, compatible with LITE6 and MOVE6

The cuff has a universal size. After filling with air, it adapts perfectly to the body.

The cuff is equipped with the "overlapping/fishbone" system - the chambers into which the cuffs are divided overlap each other, which prevents fluids from flowing back during the procedure, improving its efficiency.

Hip and Abdominal Cuff, 8-chamber CarePump Series with Air Tube Hip and Abdominal Cuff, 8-chamber CarePump Series with Air Tube Hip and Abdominal Cuff, 8-chamber CarePump Series with Air Tube Hip and Abdominal Cuff, 8-chamber CarePump Series with Air Tube

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03507

Hip and abdominal cuff, 8-chamber in set with air hose, compatible with EXPERT8 and MOVE8

The cuff has a universal size. After filling with air, it adapts perfectly to the body.

The cuff is equipped with the "overlapping/fishbone" system - the chambers into which the cuffs are divided overlap each other, which prevents fluids from flowing back during the procedure, improving its efficiency.

Left arm, shoulder and chest cuff, 6-chamber CarePump series with air hose

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03524

Application of the cuff:

It enables the performance of mechanical lymphatic drainage (compression massage) in the area of the left hand, shoulder and breast. Used in the treatment of edema, post-traumatic rehabilitation, post-workout regeneration, relaxation, after mastectomy. Due to the fact that the cuff also covers the arm and part of the chest, the "pushing" of fluids into the lymph nodes is more effective than when using a standard wrist cuff.

Cuff compatible with CarePump LITE6 and MOVE6 .

Complete cuff, ready to connect to the device

The cuff is complete, which means that it includes wires to connect it to the camera.

Left arm, shoulder and chest cuff, 8-chamber CarePump series with airway

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03508

Application of the cuff:

It enables the performance of mechanical lymphatic drainage (compression massage) in the area of the left hand, shoulder and breast. Used in the treatment of edema, post-traumatic rehabilitation, post-workout regeneration, relaxation, after mastectomy. Due to the fact that the cuff also covers the arm and part of the chest, the "pushing" of fluids into the lymph nodes is more effective than when using a standard wrist cuff.

Cuff compatible with CarePump EXPERT8 and MOVE8

Complete cuff, ready to connect to the device

The cuff is complete, which means that it includes wires to connect it to the camera.

Right leg cuff, 4-chamber CarePump series with airway

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03539

Right leg cuff, 4-chamber set with an air hose, compatible with the following devices: COMPACT4 , LITE4 , MOVE4 .

The cuff has a universal size. For slim people, after filling with air, it perfectly adapts to the body, while for people with a larger leg circumference, it is possible to buy a widener.

The cuff is equipped with the "overlapping/fishbone" system - the chambers into which the cuffs are divided overlap each other, which prevents fluids from flowing back during the procedure, improving its efficiency.

Right leg cuff, 6-chamber CarePump series with airway

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03526

Right leg cuff, 6-chamber in set with air hose, compatible with LITE6 and MOVE6

The cuff has a universal size. For slim people, after filling with air, it perfectly adapts to the body, while for people with a larger leg circumference, it is possible to buy a widener.

The cuff is equipped with the "overlapping/fishbone" system - the chambers into which the cuffs are divided overlap each other, which prevents fluids from flowing back during the procedure, improving its efficiency.

Right leg cuff, 8-chamber CarePump series with airway

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03510

Right leg cuff, 8-chamber in set with air hose, compatible with EXPERT8 and MOVE8

The cuff has a universal size. For slim people, after filling with air, it perfectly adapts to the body, while for people with a larger leg circumference, it is possible to buy an expander.

The cuff is equipped with the "overlapping/fishbone" system - the chambers into which the cuffs are divided overlap each other, which prevents fluids from flowing back during the procedure, improving its efficiency.

Right arm, shoulder and chest cuff, 6-chamber CarePump series with airway

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03527

Application of the cuff:

It enables the performance of mechanical lymphatic drainage (compression massage) in the area of the right hand, shoulder and breast. Used in the treatment of edema, post-traumatic rehabilitation, post-workout regeneration, relaxation, after mastectomy. Due to the fact that the cuff also covers the arm and part of the chest, the "pushing" of fluids into the lymph nodes is more effective than when using a standard wrist cuff.

Cuff compatible with CarePump LITE6 and MOVE6 .

Complete cuff, ready to connect to the device

The cuff is complete, which means that it includes wires to connect it to the camera.

Right arm, shoulder and chest cuff, 8-chamber CarePump series with airway

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03511

Application of the cuff:

It enables the performance of mechanical lymphatic drainage (compression massage) in the area of the right hand, shoulder and breast. Used in the treatment of edema, post-traumatic rehabilitation, post-workout regeneration, relaxation, after mastectomy. Due to the fact that the cuff also covers the arm and part of the chest, the "pushing" of fluids into the lymph nodes is more effective than when using a standard wrist cuff.

Cuff compatible with CarePump EXPERT8 and MOVE8

Complete cuff, ready to connect to the device

The cuff is complete, which means that it includes wires to connect it to the camera.

Previous Wrist cuff, 4-chamber for CarePump series devices with air tube Wrist cuff, 4-chamber for CarePump series devices with air tube Wrist cuff, 4-chamber for CarePump series devices with air tubeNext Wrist cuff, 4-chamber for CarePump series devices with air tube

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03540

Wrist cuff, 4-chamber in a set with an air hose, compatible with devices: COMPACT4 , LITE4 , MOVE4 .

The cuff has a universal size. After filling with air, it adapts perfectly to the body.

The cuff is equipped with the "overlapping/fishbone" system - the chambers into which the cuffs are divided overlap each other, which prevents fluids from flowing back during the procedure, improving its efficiency.

Wrist cuff, 6-chamber for CarePump series devices with air tube

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03528

Wrist cuff, 6-chamber in set with air hose, compatible with LITE6 and MOVE6

The cuff has a universal size. After filling with air, it adapts perfectly to the body.

The cuff is equipped with the "overlapping/fishbone" system - the chambers into which the cuffs are divided overlap each other, which prevents fluids from flowing back during the procedure, improving its efficiency.

Wrist cuff, 8-chamber for CarePump series devices with air tube

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03512

Wrist cuff, 8-chamber in set with air hose, compatible with EXPERT8 and MOVE8

The cuff has a universal size. After filling with air, it adapts perfectly to the body.

The cuff is equipped with the "overlapping/fishbone" system - the chambers into which the cuffs are divided overlap each other, which prevents fluids from flowing back during the procedure, improving its efficiency.

Double Cuff for Arms, Shoulders and Chest, 6-chamber CarePump with Air Tube, Dilators and Divider

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03529

Application of the cuff:

It enables the performance of mechanical lymphatic drainage (compression massage) in the area of both hands, shoulders and chest. Used in the treatment of edema, post-traumatic rehabilitation, post-workout regeneration, relaxation, after mastectomy. Due to the fact that the cuffs also overlap the arms and chest, the "pushing" of fluids into the lymph nodes is more effective than using a standard wrist cuff.

Cuff compatible with CarePump LITE6 and MOVE6 .

Complete cuff, ready to connect to the device

The cuff includes: two single arm cuffs (right and left) with air hoses and dilators increasing the circumference by 10 cm.

Double Cuff for Arms, Shoulders and Chest, 8-chamber CarePump with Air Tube, Dilators and Divider

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03513

Application of the cuff:

It enables the performance of mechanical lymphatic drainage (compression massage) in the area of both hands, shoulders and chest. Used in the treatment of edema, post-traumatic rehabilitation, post-workout regeneration, relaxation, after mastectomy. Due to the fact that the cuffs also overlap the arms and chest, the "pushing" of fluids into the lymph nodes is more effective than using a standard wrist cuff.

Cuff compatible with CarePump EXPERT8 and MOVE8 .

Complete cuff, ready to connect to the device

The cuff includes: two single arm cuffs (right and left) with air hoses and dilators increasing the circumference by 10 cm.

Leg cuff extender, 4 chambers for CarePump series devices

Price: 0 EUR (0-EUR) + shipping cost

Product code: SR03541

Leg cuff extender, 4 chambers for CarePump MOVE4 operated cuffs

Leg cuff extender, 6-chamber for CarePump series devices

Price: 0 EUR (~~0-EUR~~) + shipping cost

Product code: SR03530

Leg cuff extender, 6 chambers for CarePump MOVE6 operated cuffs

Leg cuff extender, 8-chamber for CarePump series devices

Price: 0 EUR (~~0 EUR~~) + shipping cost

Product code: SR03514

Leg cuff extender, 8-chamber for CarePump MOVE8 cuffs

Leg cuff extender for WIC 2008/WIC 2008M

Price: 0 EUR (~~0-EUR~~) + shipping cost

Product code: SR03576

When attached to the WIC 2008/WIC 2008M leg cuff, it extends the circumference of the cuff by:

10-11 cm - thigh,

7-8 cm - knee,

5-6 cm - middle of the calf,

4-4.5 cm - around the ankle.

Extenders (set of 2) for long pants, 6 chambers for CarePump series

Price: 0 EUR (~~0-EUR~~) + shipping cost

Product code: SR03531

They make it possible to widen the circumference of the cuff in the form of 6-chamber long trousers. Designed for cuffs supported by 6-chamber devices: LITE6 and MOVE6 .

Extenders (set of 2) for long pants, 8 chambers for CarePump series

Price: 0 EUR (0-EUR) + shipping cost

Product code: SR03515

They allow you to widen the circumference of the cuff in the form of 8-chamber long pants. Designed for cuffs operated by 8-chamber devices: EXPERT8 and MOVE8 .

Extenders (set of 2) for short pants, 4 chambers for CarePump series

Price: 0 EUR (~~0-EUR~~) + shipping cost

Product code: SR03542

They allow you to widen the circumference of the cuff in the form of 4-chamber short pants. Designed for cuffs operated by 4-chamber devices: LITE4 , MOVE4

Extenders (set of 2) for 6-chamber short pants for CarePump series

Price: 0 EUR (~~0-EUR~~) + shipping cost

Product code: SR03532

They allow you to widen the circumference of the cuff in the form of 6-chamber short pants. Designed for cuffs operated by 6-chamber devices: LITE6 , MOVE6

Extenders (set of 2) for 8-chamber short pants for CarePump series

Price: 0 EUR (0-EUR) + shipping cost

Product code: SR03516

Extenders (set of 2) for 8-chamber short pants for CarePump series

Double cuff dilators (pack of 2) for arms, shoulders and chest, 6-cell for CarePump series

Price: 0 EUR (0-EUR) + shipping cost

Product code: SR03533

Allows expansion of the chest circumference of the 6-chamber double cuff for arms, shoulders and chest, compatible with LITE6 and MOVE6 devices .

Double cuff dilators (pack of 2) for arms, shoulders and chest, 8-cell for CarePump series

Price: 0 EUR (0-EUR) + shipping cost

Product code: SR03518

Application:

Allows expansion of the chest circumference of the 8-chamber double cuff for arms, shoulders and chest, compatible with EXPERT8 and MOVE8 devices .

Portable, veterinary Kora Basic Kit for magnetotherapy

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03492

The IACER KORA magnetotherapy set was created to improve the well-being of pets and has been adapted to their needs. It is suitable for pets of all sizes and has programs dedicated to the treatment of various pathologies. The product is based on veterinary clinical research and the expertise of IACER's clinical engineering department to guarantee safe and certified care for four-legged patients.

KORA magnetotherapy set:

KORA is the latest magnetic therapy kit for pets that helps reduce pain and inflammation. It consists of a comfortable magnetotherapy mat (area 64x40cm) fastened with Velcro on the side, a power supply unit and a device for selecting programs (up to two mats can be connected to each device). Ready-made therapeutic programs are available in the device, updated in accordance with the latest veterinary clinical research, ensuring targeted and effective treatment of individual diseases. For small pets, it is recommended to use only one KORA mat. In the case of larger animals, it is recommended to use two KORA mats, which can be joined together with a convenient side Velcro (total area 64x80cm).

Technical data:

- 18 programs, of which 14 are dedicated to specific therapeutic protocols
- 2 independent output channels
- Color display
- Output field strength: 100 G (gauss) per channel
- Frequency: set in therapy programs

Programs:

- Analgesic
- Arthritis
- Arthrosis
- Muscle atrophy
- Discopathy
- Fractures
- Keloids
- Ligament injuries
- Tendon injuries
- Sciatica
- Neuropathies
- endoprotheses
- Bone necrosis

- Osteoporosis
- 1Hz
- 18Hz
- 50Hz
- 75Hz

Safety button for CarePump devices

Price: 0 EUR (~~0-EUR~~) + shipping cost

Product code: SR03547

Patient Safety Button for stationary CarePump units. Allows emergency deflation of air from the cuff during the procedure. The safety button can be connected to the following cameras: EXPERT8 , COMPACT4 , LITE6 and LITE4 .

Dual Airline Manifold (Long, 150cm), 4 Chambers for CarePump Series

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03543

It allows you to connect the hoses of two 4-chamber cuffs to the device at the same time, thanks to which both cuffs will inflate at the same time. Compatible with cameras: LITE4 , MOVE4

Double manifold (long, 150cm), 8 chambers for CarePump series

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03519

Application:

It allows you to connect the hoses of two 8-chamber cuffs to the device at the same time, thanks to which the two cuffs will inflate at the same time. Compatible with cameras: EXPERT8 , MOVE8 .

Dual Airline Manifold (Long, 150cm), 6 Chambers for CarePump Series

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03534

Application:

It allows you to connect the hoses of two 6-chamber cuffs to the device at the same time, thanks to which the two cuffs will inflate at the same time. Compatible with cameras: LITE6 , MOVE6 .

Double manifold, 4-chamber, for CarePump series devices

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03544

Double Airline Manifold, 4-chamber compatible with CarePump MOVE4 Cuff Tubing

Double manifold, 4-chamber, for CarePump series devices

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code:

Double Airline Manifold, 4-chamber compatible with CarePump MOVE4 Cuff Tubing

Double manifold, 6-chamber, for CarePump series devices

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03535

Double Airline Manifold, 6-chamber compatible with CarePump MOVE6 Cuff Tubing

Double manifold, 8-chamber, for CarePump series devices

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03520

Double manifold for air ducts, 8 chambers

Previous AMAZONKA set for left hand lymphatic drainage 6-chamber CarePump Lite6 device + 1 cuff for left hand, shoulder and chest AMAZONKA set for left hand lymphatic drainage 6-chamber CarePump Lite6 device + 1 cuff for left hand, shoulder and chest AMAZONKA set for left hand lymphatic drainage 6-chamber CarePump Lite6 device + 1 cuff for left hand, shoulder and chest AMAZONKA set for left hand lymphatic drainage 6-chamber CarePump Lite6 device + 1 cuff for left hand, shoulder and chest AMAZONKA set for left hand lymphatic drainage 6-chamber CarePump Lite6 device + 1 cuff for left hand, shoulder and chest AMAZONKA set for left hand lymphatic drainage 6-chamber CarePump Lite6 device + 1 cuff for left hand, shoulder and chest

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03555

CarePump LITE6 is a device that allows you to set basic parameters (pressure, treatment time, chamber filling rate, operating mode) especially recommended for home use. For professional use, we recommend choosing the Advanced series device, which offers a wider range of treatment settings and supports cuffs with a larger number of chambers, e.g. the 8-chamber CarePump EXPERT8 .

Intended use:

- physical treatment of post-traumatic conditions,
- prevention of circulatory and lymphatic system failure,
- diseases causing swelling,
- lymphatic insufficiency after mastectomy,
- feeling of "heavy legs",
- cellulite,
- exudates,
- prevention and prophylaxis in the treatment of obesity and overweight,
- past infectious diseases (in order to strengthen the body and remove toxins),
- accelerating the absorption of hematomas or bruises by stimulating microcirculation.

Technical data

- Supported cuffs: 6-chamber
- Cuff type: overlapping, fishbone
- Pressure: 20-220mmHg
- Number of treatment programs: 6
- Treatment time: 1-120 minutes
- Possibility to turn off the chambers: YES
- Treatment rate adjustment: 1-5
- Display: 5" color touch screen
- Dimensions: 300x260x160mm
- Weight: 2.8 kg

Advantages of the Lite6 camera

- Actual cuff pressure measurement
- The device, as one of the few on the market, has the function of real pressure measurement in the cuff, thanks to which the pressure set on the device corresponds to the pressure on the patient's body, regardless of the size of the limb and the width of the cuff.
- Certificate of the Polish Lymphological Society
- The device is accredited by a medical organization associating

specialists in the field of anticongestive therapy.

- Polish production and service
- Polish production of the camera, taking into account the needs of specialists at the device design stage. Service located in Krakow with quick handling of requests.
- 6 operating modes - treatment algorithms
- The device has 6 operating modes (methods of cuff inflation) developed by the Polish Lymphological Society, including: fatty edema, regeneration, prophylaxis, lymphedema.
- Precise parameter adjustment
- The device allows very precise adjustment of parameters to 1 mmHg in the case of setting pressure, or 1 min in time settings.
- Possibility to turn off individual chambers
- A function that is particularly desirable in the case of certain diseases and injuries. It allows you to exclude any chamber from the procedure (no pumping).
- Overlapping cuffs
- A system of overlapping chambers has been used in the cuffs, which prevents the lymph from flowing back during the procedure, making it more effective.
- Low volume
- Quiet operation, conducive to relaxation, allowing you to talk freely or watch TV.
- Emergency air extraction from all chambers in the model
- It is possible to buy a safety button that allows emergency interruption of the procedure.

Kit Contents:

LITE6 6-chamber pressotherapy apparatus, power supply, cuff for the left hand, shoulder and chest 1 pc.

A wide range of cuffs:

Additionally, you can buy:

- left leg cuff
- right leg cuff

- splitter (in case you want to connect two cuffs to the device at the same time)
- short pants cuff
- cuff - belt for hips and belly
- Cuff - long pants, 6-chamber
- Cuff for the left hand, shoulder, chest, 6-chamber
- Wrist cuff

Modes of operation

CarePump LITE6 has 6 different operating modes (treatment algorithms) dedicated to various diseases/indications. Therapeutic algorithms have been developed based on the experience and knowledge of experts from the Polish Lymphological Society. For each of the programs, you only need to enter the pressure value.

AMAZONKA Right Hand Lymphatic Drainage Kit 6-chamber CarePump Lite6 + 1 cuff for right hand, shoulder and chest

Price inquiry: +48 605999769, kontakt@openmedis.pl

Modes of operation

CarePump LITE6 has 6 different operating modes (treatment algorithms) dedicated to various diseases/indications. Therapeutic algorithms have been developed based on the experience and knowledge of experts from the Polish Lymphological Society. For each of the programs, you only need to enter the pressure value.

BEAUTY set for lymphatic drainage (compression massage) 8-chamber - Expert8 apparatus

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03551

CarePump EXPERT8 is an innovative device for intermittent pneumatic compression, intended for professional use in physiotherapy, cosmetology, biological regeneration and all types of rehabilitation facilities. Thanks to the intelligent function of the gradient, interval, hold, individual pressure settings for each chamber in the cuff and the ability to program your own treatment algorithms, EXPERT8 allows you to adjust the parameters to the needs of each patient.

CarePump EXPERT8 applications

to rehabilitation rooms, hospital and sanatorium wards. The device has 13 therapeutic programs developed by the Polish Lymphological Society, dedicated to individual diseases, including lymphoedema, venous, fatty, etc. for beauty salons and spas, for treatments reducing cellulite and improving the quality of skin tissue, as well as after liposuction treatments. The device has a special program dedicated to cellulite reduction.

CarePump EXPERT8 is a device with advanced settings enabling very precise and especially recommended for professional use. For use at home, we recommend choosing a camera from the LITE series, more affordable and with basic settings, e.g. LITE6.

Intended use:

- physical treatment of post-traumatic conditions,
- prevention of circulatory and lymphatic system failure,
- diseases causing swelling,
- lymphatic insufficiency after mastectomy,
- feeling of "heavy legs",
- cellulite,
- exudates,
- prevention and prophylaxis in the treatment of obesity and overweight,
- past infectious diseases (in order to strengthen the body and remove toxins),
- accelerating the absorption of hematomas or bruises by stimulating microcirculation.

Technical data:

- Supported cuffs: 8-chamber
- Cuff tape: overlapping, fishbone
- Pressure: 20-220mmHg
- Number of treatment programs: 13
- Treatment time: 1-120 minutes
- Possibility to turn off the chambers: YES
- Treatment rate adjustment: 1-5
- Display: 7" color touch screen
- Dimensions: 300x260x160mm
- Weight: 2.8 kg

Benefits of CarePump EXPERT8

- Actual cuff pressure measurement
- The device, as one of the few on the market, has the function of real pressure measurement in the cuff, thanks to which the pressure set on the device corresponds to the pressure on the patient's body, regardless of the size of the limb and the width of the cuff.
- Certificate of the Polish Lymphological Society
- The device is accredited by a medical organization associating specialists in the field of anticongestive therapy.

OpenMedis

- Polish production and service
- Polish production of the camera, taking into account the needs of specialists at the device design stage. Service located in Krakow with quick handling of requests.
- 13 operating modes - treatment algorithms
- The device has 13 operating modes developed by the Polish Lymphological Society: 4 programs dedicated to lymphatic edema, two programs for the treatment of venous and fatty edema, post-traumatic therapy, cellulite advanced, regeneration, prevention and relaxation, global massage.
- Precise parameter adjustment
- Very precise adjustment of parameters with an accuracy of 1 when setting pressure, treatment time, hold function, interval.
- Individual pressure for each chamber
- Possibility to set individual pressure in each chamber, including its shutdown.
- Smart gradient function
- The ability to set the gradient (pressure drop in the next pumped chamber) by a value expressed as a percentage or in mmHg or - after setting the initial and final pressure - automatic conversion of the gradient value.
- Programming your own algorithms
- Possibility to save up to 100 own programs, each of which can consist of 25 pumping cycles of different chambers.
- Facilitations for visually impaired and blind people
- Voice messages and the ability to start the treatment using only a special keyboard with directional signs. The device was developed in cooperation with the president of the Polish Association of the Blind - Sebastian Biały.
- Emergency air extraction from all chambers in the model
- It is possible to buy a safety button that allows emergency interruption of the procedure.

Kit Contents:

8-chamber EXPERT8 pressotherapy apparatus, power supply, long pants cuff.

A wide range of cuffs:

Additionally, you can also buy:

- left leg cuff ,
- right leg cuff ,
- splitter (if you want to connect two cuffs to the device at the same time),
- 8-chamber wrist cuff
- Cuff short pants
- Belt for the hips and belly
- 8-chamber double cuff for arms, shoulders and chest
- Cuff for the right arm, shoulder and chest 8-chamber
- 8-chamber left arm, shoulder and chest cuff

Modes of operation

CarePump EXPERT8 has as many as 13 different operating modes (treatment algorithms) dedicated to various diseases, which makes it easier to choose the right way to inflate the cuffs for a given patient. Therapeutic algorithms have been developed based on the experience and knowledge of experts from the Polish Lymphological Society. For each of the programs, you only need to enter the pressure value.

Dimensions of the cuffs for the lower limbs

- Thigh circumference (at the widest point) - 70 cm
- Thigh circumference (center) - 62 cm
- Knee circumference - 56 cm

- Calf circumference - 52 cm
- Ankle circumference - 48 cm
- Thigh - heel - 94 cm
- Thigh - metatarsus - 110 cm
- Toes - heel - 22.5 cm

PREMIUM set for lymphatic drainage (compression massage) 8-chamber Expert8

Price inquiry: +48 605999769, kontakt@openmedis.pl

- The ability to set the gradient (pressure drop in the next pumped chamber) by a value expressed as a percentage or in mmHg or - after setting the initial and final pressure - automatic conversion of the gradient value.
- Programming your own algorithms
- Possibility to save up to 100 own programs, each of which can consist of 25 pumping cycles of different chambers.
- Facilitations for visually impaired and blind people
- Voice messages and the ability to start the treatment using only a special keyboard with directional signs. The device was developed in cooperation with the president of the Polish Association of the Blind - Sebastian Biały.
- Emergency air extraction from all chambers in the model
- It is possible to buy a safety button that allows emergency interruption of the procedure.

Kit Contents:

- 8-chamber EXPERT8 pressotherapy apparatus ,
- power cable,
- left leg cuff ,

- right leg cuff ,
- double air duct distributor (long, 150cm)

(if you want to connect two cuffs to the camera at the same time),

- double cuff on arms, shoulders and chest
- cuff - belt for hips and belly .

Modes of operation

CarePump EXPERT8 has as many as 13 different operating modes (treatment algorithms) dedicated to various diseases, which makes it easier to choose the right way to inflate the cuffs for a given patient. Therapeutic algorithms have been developed based on the experience and knowledge of experts from the Polish Lymphological Society. For each of the programs, you only need to enter the pressure value.

Dimensions of the cuffs for the lower limbs

- Thigh circumference (at the widest point) - 70 cm
- Thigh circumference (center) - 62 cm
- Knee circumference - 56 cm
- Calf circumference - 52 cm
- Ankle circumference - 48 cm
- Thigh - heel - 94 cm
- Thigh - metatarsus - 110 cm
- Toes - heel - 22.5 cm
