

Cervical vertebral column with stand

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: MA01026

A life-size cast showing the thoracic segment of the human spine (from TH1 to TH12), the spinal cord and the outgoing spinal nerves. Demonstrates intervertebral joints formed by the articular processes of the respective vertebrae. Individual elements of vertebral structure and their arrangement are characteristic of the thoracic spine.

Additional features:

- Enables demonstration of the thoracic spine mobility.
- The intervertebral discs are made of a special rubber material.
- With a base
