Product code: SR00103

The AIREX® Atlas is the largest mat in the product range. Thanks to its rectangular shape, an even larger cohesive section can be covered by several mats when required. The material characteristics and the thickness of 1.5 cm are equivalent to the best-selling Corona and Coronella products. Pushing through to the floor is not possible, even with point loads. In water applications, the AIREX® Atlas constitutes the optimum basis for all conceivable forms of therapy and invites creative water play.
