

Skeleton of arm + shoulder girdle + muscle marking

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: MA01046

Life-size bone model of the hand and forearm. It presents all the bones of the hands: wrist, metacarpus, phalanges. Has the ability to perform translatorial and anatomical movements between individual bones. Additionally, it contains forearm bones. Thanks to the special form of connection, it is possible to demonstrate pronation and supination movements.
