

Atherothrombosis-model with removable thrombus

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: MA01216

Product information: Atherothrombosis-model with removable thrombus This greatly enlarged model of a human artery shows a cut through the vascular wall with intima, media and adventitia. Clearly visible there is a plaque accumulation in the vascular wall with rupture and a thrombus. The thrombus can be removed to explain the principles of formation very easily.

Size: 15 x 5.5 x 4.5 cm
