

Critical Care Canine Phantom

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: M01400

A realistic phantom of an adult dog with cervical and vascular access, designed to learn how to perform intensive therapy in emergency situations. It has a realistically rendered trachea, esophagus and epiglottis, artificial pulse and functions for splinting and bandaging.

The trainer allows you to learn the following:

- airway management,
- ventilation,
- endotracheal intubations,
- mouth-nose resuscitation,
- circulation with external chest compressions

In addition, it has working lungs and an artificial pulse as well as the function of splinting and bandaging.

Set contains

- the carrying case are a kneeling pad,
- endotracheal tube,
- syringe,
- brush,
- 5 disposable lungs.

Additional function (additionally payable)

- The opportunity to learn how to properly treat a femur fracture
- Femur fracture
