Product code: M01402

It is fairly common for a dog to become infected with an external parasite at some point in its lifetime. Parasites can affect your dog in a variety of ways, ranging from simple irritation to causing life-threatening conditions if left untreated. Some parasites can even infect and transmit diseases to people. This model here shows in great detail the three most common external parasites a mite, flea, and tick.

Size: appr. 27 x 16 x 15 cm
