

## Male and Female Catheterization, Ostomy Care Simulator

**Price inquiry:** +48 605999769, [kontakt@openmedis.pl](mailto:kontakt@openmedis.pl)

Product code: SM01505

This “two-in-one” simulator allows:

- Catheterization: The interchangeable male and female genital organs feature a modular urethral valve to prevent fluid leakage.
- Ostomy care: 3 stomas (transverse colostomy, ileostomy, suprapubic) may be dilated and allow practice of irrigation procedures as well as application of ostomy bags.
- Each stoma is connected to an internal tank. Supplied with carrying bag.
