

SimulScope Auscultation-System

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SM01811

The SimulScope allows physicians and students the ability to hear live physiological sounds with up to 20 other people at the same time. The SimulScope provides less intrusion on patients as only one stethoscope is placed on him or her. It is also effective in the simulation lab or classroom when used with simulators or manikins. Changing from low frequency to high frequency is easy with the SimulScope. Landmarks are provided on the unit to indicate best settings for both heart and breath sounds. Using a HeartMan Infrared Headphone, up to 20 listeners can engage simultaneously. The stethoscope attached to the SimulScope acts as a receiver of sounds, the SimulScope acts as a broadcasting unit, and the HeartMan headphone acts as a receiver projecting sounds into the ear through binerals. This FDA approved product is popular in both universities and hospitals.

The product includes: 6 HeartMan Infrared Headphones, 1 Stethoscope Assembly, 1 Power Supply for Charging the Battery, SimulScope Carrying Case.
