

Diabetic injection pad, advanced version

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SM01854

Unlike other injection pads this advanced pad gives the opportunity to practice with a normal and a hardened abdominal wall. It allows the student to form a realistic fold for injection. Due to special material it gives a lifelike impression of touch and feel, almost like in a real patient. The model is perforation proof and can be attached to the students' body using a flexible band.
