

## Dog phantom for CPR training

**Price inquiry:** +48 605999769, [kontakt@openmedis.pl](mailto:kontakt@openmedis.pl)

Product code: MZ01906

A multipurpose, realistic mannequin of an adult dog for CPR training. The scale 1: 1. The mouth and snout are connected to separate artificial lungs that allow a realistic movement of the chest when the air flows through the channels placed inside the trainer. The chest is built in a way that allows compressions. Phantom also has an active pulse with the ability to manually simulate rhythmic or arrhythmic heartbeats. All limbs are adapted for splinting and bandaging. The fangs are made of a material similar to rubber, while maintaining the best possible sanitary requirements.

### Main functions:

- resuscitation,
- intubation,
- chest compressions,
- heart rate simulator
- multifunctional limbs e.g. for bandaging

### Set contains:

- 1 natural size mannequin
- 4 inflatable lungs
- 1 foam insert for compressions
- 1 simulator imitating the pulse
