

Cervical assesment and fetal position simulator

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SM01920

Product information: Cervical assesment and fetal position simulator This high class simulator in the form of the lower part of the woman's body consists a crotch made of realistic material and proximal fragments of thighs. It was designed to enable simulated training to assess cervical dilation and to determine its maturity using the Bishop scale.

Features:

- Genital area made of innovative material that excels in elasticity, durability and resilience allowing repetitive training opportunity.
- Interchangeable five stages of cervical dilatation module can be installed with a single action. Descent of the fetal head can also be set.
- Anatomically correct landmarks including the ischial spine and pubic symphysis.
- Posterior fontanelle to determine the fetal position.

Training Skills:

1. Cervical Examination:

- Determination of bishop score(cervix score) using landmarks of the ischial spine and pubic symphysis.
- Assessment of cervical dilatation
- procedures of urine catheterization
- Procedures of cervical cytology

2. Speculum Examination

Cervical Assessment Simulator Set Includes:

- 1 maternal body
- 1 genitalia unit
- 1 cervix unit
- 1 set of cervical dilatation module (5 variations)
- 1 holder for the cervical dilatation module
- 3 lubricant (150 ml)
- 1 talcum powder
- 1 instructional manual
