

## Canine Leg Vascular Access Simulator

**Price inquiry:** +48 605999769, [kontakt@openmedis.pl](mailto:kontakt@openmedis.pl)

Product code: MZ01948

A realistically made model of a dog's limb for training skills in venipuncture and insertion of a 22 or smaller catheter.

### **Application Advantages:**

- The use of special materials increases the realism and effectiveness of the exercises.
- The model encourages students to practice vascular access techniques without the need for a partner or live animal.

### **Set contains:**

- 1000 ml bag
- powdered artificial blood
- imitation leather
- instructions for configuration, maintenance and use of the model

### **Replaceable consumables:**

- black or brown leather
- replaceable cephalic vein
- A container with powdered artificial blood
- A bag with a capacity of 1000ml
