

Bovine skull anatomy model, artificial

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: MZ01970

A model of a bovine skull made on a 1:1 scale. It was developed on the basis of real bovine skulls together with veterinary teachers, in that it contains most of the major anatomical structures necessary to learn the anatomy of the skull of a cow. This **bovine skull** also has a detachable mandible with full teeth, which can be attached to the skull at any time using magnets placed in the model.

Additional information:

- short production time about 3-4 days
- life size
- anatomical detail
- detachable mandible
