

Sheep skull model, artificial

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: MZ01982

A model of a sheep's skull made on a 1: 1 scale. It has been developed on the basis of scans of real bovine skulls together with veterinary teachers, in that it contains the most important anatomical structures needed to study the anatomy of sheep's skull. The skull also has a detachable mandible with full dentition, which can be attached to the skull at any time using magnets placed in the model.

Additional information:

- short production time approx. 3-4 days
- short delivery time
- life size, 1: 1 scale
- anatomical details
- detachable lower jaw
