

Decubitus ulcer model in the sacrum area, cleaned

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SM02002

A realistic model of a decubitus wound after surgical cleansing of necrotic tissue located in the sacral area. The borders of the wound and anal folds are visible. The model is made of flexible material that adapts perfectly to the adjacent surface. It can be placed on both students and mannequins. Can be used for demonstration of vacuum therapy. Available in two variants - as a bedsore freshly cleaned or with exudate. Supplied with a box.
