

## Canine Head Phantom for intubation training

**Price inquiry:** +48 605999769, [kontakt@openmedis.pl](mailto:kontakt@openmedis.pl)

Product code: MZ02300

The trainer makes it possible to learn and practice correct intubation procedures in dogs. It allows you to acquire appropriate skills before starting work with a live animal. The mannequin has a movable lower jaw, flexible tongue and epiglottis. It has both the trachea and the esophagus, as well as our special index indicating a positive or negative result of the intubation procedure performed. Base with suction cups The suction cup fits most smooth table tops and provides adequate stability during training.

### Specification:

- Dog head made of rubber, washable material
- Flexible jaw and tongue
- Table holder with suction cups
- Adjustable head tilt angle
- A measure that shows the effectiveness of the performed procedure
