

Disarticulated Human Fetal Skull, Full Term

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: MA02329

This disarticulated skull is from a full term (10 lunar months) fetus. It was part of a medical examiner's comparative pathology collection before going to the Maxwell Museum and is remarkable in its completeness. It was possible to reproduce every bone, small and large, in precise detail. A perfect specimen for study in forensic anthropology, physical anthropology and anatomy.
