Adult heart for multipurpose is a realistic artificial human heart that is majorly used by hospitals, researchers and medical schools for research & development as well as to train medical students and residents with various medical practices. Our heart model is compatible with endoscopic, ultrasound, MRI, CT and various medical imaging technologies.

The picture represents the phantom/model without a water tank. An optional water tank helps researchers in obtaining an enhanced view of the internal structure of the heart. The chambers and vessels are anatomically correct.
