

Emma Cow - Advanced simulator for artificial insemination (AI) of the cow

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: MZ02390

The Simulator in the form of a cow's rump (female breeding cattle), natural dimensions, supported on a base with wheels. It allows for training and observation of palpation manipulation performed by the exercising person during the insemination procedure and examination per rectum.

Advantages:

- The set includes a complete artificial reproductive system, one easy cervix and a handpiece.
- Replaceable panel of the reproductive system, natural dimensions, with characteristic anatomical structures, mounted in the correct anatomical position in the simulator structure, suspended in the pelvic cavity in a manner imitating natural suspension, made of flexible materials imitating and providing realistic treatment sensations of living tissue - applies to external elements (vulva) and internal (cervical)
- The function of heating internal organs to a natural temperature.
- It is possible to adjust the model specification to the needs of a specific project

Specification:

- Length: approx. 95 cm
- Height: approx. 145 cm
- Width: approx. 50 cm
- Base dimensions: 82x76cm
- Weight: approx. 50 kg.

Additional parts available (additionally payable):

- Additional cervix (easy AI procedure),
- Additional cervix (Difficult AI procedure),
- Insemination gel,
- Silicone uterus,
- Extra uterus at different times of pregnancy
- Silicone vagina tube,
- The posterior part of the reproductive system,
- Tail
- Rectum
- Ovary small vesicles,
- Ovary large vesicles,
- ovarian cyst,

- Corpus luteum
