

Skull model for dentistry and jaw surgery, 5 parts

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: AM02637

In addition to the detailed reproduction of the skull structures, this first-class model of a human skull focuses specifically on teeth and jaws and is therefore the perfect teaching and demonstration tool for the field of dentistry and oral surgery. The front half of the upper and lower jaw can be removed, revealing teeth with roots, nerves and blood vessels on one side, and the maxillary sinuses. The skull is not only suitable as a perfect aid for learning anatomy, but also as an explanation aid for jaw surgery and implantology.
