

Aging Glasses Set

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SM02788

A practical set designed to simulate visual impairment in old age. It includes a total of 6 glasses placed in an ergonomic case for easy carrying. Glasses simulate the following eye defects: age-related macular degeneration, glaucoma, hemianopia (hemianopia), cataracts, presbyopia, and retinopathy.

Application:

- studio equipment
- simulation of visual defects allows the user to experience changes that occur in the eye with age
- Addition equipment to other age-sensation simulators available on the market
