

A 3-year-old child's arm simulator to learn injection

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SM02815

Product information: A 3-year-old child's arm simulator to learn injection Realistic vein puncture training arm. The veins are palpable and the stinging sensation is very realistic. Models include the forearm cephalic vein, the middle forearm vein, and the cephalic vein. During puncture, the veins behave realistically, there is a back flow. The skin closes automatically when the needle is removed. The arms are consumables and must be replaced after frequent use.
