

DIALYSIS ARMCHAIR

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: WG03033

Dialysis armchair is used for dialysis treatments and is designed as compatible with other dialysis devices which makes it easier to connect a patient to extracorporeal blood circulation.

Dialysis armchair features electrically controlled height adjustment on column actuator and fully electrically adjusted three-part top. The armchair is encased in ABS plastic. Dialysis armchairs of K01 series are equipped with full bearing adjustment mechanisms. Equipment and accessories are finished in stainless steel to ensure durability and reliable operation at all times.

Features:
