

TRANSPORT STRETCHER TROLLEYS

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: WG03046

The trolley 21 is intended for transporting a patient lying down on the premises of a hospital or other medical facilities. The trolley is made of powder coated steel profiles. The height of the trolley is hydraulically adjusted. As standard, the trolley is equipped with folding side rails, adjustable headrest with a gas spring, guides on the X-ray cassette and bumper rollers. The top of the trolley consists of an HPL plate transparent to X-rays and a polyurethane foam mattress covered with MEDITAP material. There is a shelf for the patient's personal belongings in the base of the trolley. The trolley for transporting the patient has a smooth tilt adjustment of Trendelenburg and anti-Trendelenburg with the possibility of blocking with a gas spring.

Features:

- The total length of the mattress is 195/218 cm
- The total width of the mattress is 65 / 78cm
