

## Dog pelvis phantom for CT and x-ray

**Price inquiry:** +48 605999769, [kontakt@openmedis.pl](mailto:kontakt@openmedis.pl)

Product code: FR03084

The phantom provides a realistic simulation of a dog pelvis with no contrast agent.

The advantages:

- Bones and soft tissue are displayed authentically with realistic CT values for all tissues at 120 kVp tube voltage in the CT.
- Air spaces are filled with a cellulose polymer composite with about -80 Hounsfield units.
- If the phantom is to be used primarily with other tube voltages (e.g. 100 kVp), the calibration of the CT values can be adjusted accordingly if required.
- The phantom also provides realistic tissue contrasts in X-ray imaging.
