

## Pediatric Patient Simulator - Preemie

**Price inquiry:** +48 605999769, [kontakt@openmedis.pl](mailto:kontakt@openmedis.pl)

Product code: SM03416

The NENASim Preemie is a realistic interactive simulator, to be used for neonatal intensive care training. The Preemie allows for a variety of medical procedures, preparing medical staff and everyone involved in the enormous responsibility of caring for a preterm baby. The main assets of the Preemie are its realistic airway, lifelike feel and looks, and task-training functionalities. NENASim Preemie is available in two degrees of fidelity.

Model comparison:

### Xact
