

Emergency leg

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SM03451

Complete, life size leg from hip to toe, with explosion injury (blend grenade) on the lower leg and a shot right through the upper leg.

Main advantages:

- Both wounds do have a pumping mechanism and can be used for tamponade treatment.
- On the upper leg additionally training of tourniquet use is possible.
- Both wounds can bleed independently so the situation can be adjusted to your training needs.
