

Portable, veterinary Kora Basic Kit for magnetotherapy

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03492

The IACER KORA magnetotherapy set was created to improve the well-being of pets and has been adapted to their needs. It is suitable for pets of all sizes and has programs dedicated to the treatment of various pathologies. The product is based on veterinary clinical research and the expertise of IACER's clinical engineering department to guarantee safe and certified care for four-legged patients.

KORA magnetotherapy set:

KORA is the latest magnetic therapy kit for pets that helps reduce pain and inflammation. It consists of a comfortable magnetotherapy mat (area 64x40cm) fastened with Velcro on the side, a power supply unit and a device for selecting programs (up to two mats can be connected to each device). Ready-made therapeutic programs are available in the device, updated in accordance with the latest veterinary clinical research, ensuring targeted and effective treatment of individual diseases. For small pets, it is recommended to use only one KORA mat. In the case of larger animals, it is recommended to use two KORA mats, which can be joined together with a convenient side Velcro (total area 64x80cm).
