

Right leg cuff, 4-chamber CarePump series with airway

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SR03539

Right leg cuff, 4-chamber set with an air hose, compatible with the following devices: COMPACT4 , LITE4 , MOVE4 .

The cuff has a universal size. For slim people, after filling with air, it perfectly adapts to the body, while for people with a larger leg circumference, it is possible to buy a widener.

The cuff is equipped with the "overlapping/fishbone" system - the chambers into which the cuffs are divided overlap each other, which prevents fluids from flowing back during the procedure, improving its efficiency.
