

Suprapubic (Ultrasound) Catheterization Module

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SM03650

The module can be used with ultrasound guidance, making this suitable for advanced levels of learning. This module allows trainees to practise scanning a full bladder to confirm the need for catheterization.

SKILLS GAINED

- Suprapubic catheter insertion (blind and ultrasound guided)
- Transducer handling
- Full bladder scanning

REALISM

- Ultrasound material closely mimics human skin
- Full bladder scan can be carried out to confirm the need for catheterization

VERSATILITY

- Easily interchangeable module compatible with the common base for the Catheterization Range

CLEANING

- Skin surface is washable using soap & water

SAFETY

- Product is latex free (catheters provided contain latex)

ANATOMY

- Rectus sheath for close-to-life catheter insertion
- Pubic bone
- Anatomically accurate bladder

CONTAINS

- Suprapubic (Ultrasound) Catheterization Module (Light Skin Tone)
- Suprapubic Insertion Bungs (Ultrasound Guided) (Pack of 2, Light Skin Tone)

WORKS WITH

- Pelvic Shell & Stand (Light Skin Tone)
