

Enhanced Caesarean Section Module (ECSM) - PROMPT Flex

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SM03662

The Limbs & Things Enhanced C-section module for the Birthing Simulator - PROMPT Flex is the ideal platform for practising the necessary skills required when performing both routine and complex caesarean section. Trainees can have exposure to delivering a difficult baby such as an impacted fetal head (IFH), or a transverse lie.

A pre-incised abdomen allows for repeated delivery practice to help improve confidence and familiarity of manoeuvres, including the Patwardhan's technique, reverse breech extraction, and the use of a fetal pillow. Designed with haptics and anatomic realism in mind, the module features realistic abdominal skin that has realistic appearance (including a fat layer and feel of an at-term abdomen), a realistic feel uterus interior during delivery, and the head and shoulders present are at a realistic level in relation to the uterine incision. The module is to be used in conjunction with our Birthing Simulator - PROMPT Flex Standard and Advanced, which allows for the creation of multiple simulated labor training scenarios, and is an ideal training solution for all skills relating to both routine and emergency deliveries. The birthing simulator may be used for hybrid simulation as well as stand-alone bench top training. Other modules that work in conjunction with both PROMPT Flex Standard and Advanced include:

- Post-Partum Hemorrhage
- Cervical Dilatation & Effacement
- Compression Suture Uterus
- Cervical Cerclage Lower Legs

SKILLS GAINED

- Cephalic and breech delivery
 - Application of fundal pressure
 - C-section at full dilation
 - Delivery of a baby with an impacted head:
- Abdominal cephalic disimpaction
 - Vaginal disimpaction methods (vaginal up push)
 - Reverse breech extraction
 - Patwardhan's techniques
 - Use of balloon disimpacting device (fetal pillow)
- Delivery of a transverse lie baby
 - Instrument assisted C-section delivery
 - Delivery of the placenta
 - Teamwork and human factors training in emergency C-section

OVERVIEW

- Uterus holds baby firmly in position for cephalic, breech and transverse presentations
- Fundal pressure can be applied to aid delivery of the baby for IFH manoeuvres
- Pre-incised skin allows easy repeat delivery practice

- Realistically mimics the restrictive space of the pelvic inlet for IFH manoeuvres
- Accommodates retraction using metal, plastic or rubber retractors

REALISM

- Abdominal skin has realistic appearance, fat layer and feel of at-term abdomen
- Realistic feel of uterus interior during delivery
- Head and shoulders present at realistic level in relation to the uterine incision

VERSATILITY

- Allows for training in routine and complex caesarean section at full dilation

SAFETY

- This product is latex free

CONTAINS

- Foam Uterus Support for PROMPT Flex C-Section Module
- Perineum for CSM and CD&E Modules - PROMPT Flex
- Cervix for PROMPT Flex Enhanced Cesarean Section Module
- Pre-incised Delivery Skin for ECSM - PROMPT Flex (Light Skin Tone)
- Uterus for PROMPT Flex Enhanced Cesarean Section Module (Light Skin Tone)
- Impacted Fetal Head Uterus for ECSM - PROMPT Flex (Light Skin Tone)
- Pelvic Floor for ECSM

WORKS WITH

- Foam Uterus Support for PROMPT Flex C-Section Module
- Impacted Fetal Head Uterus for ECSM - PROMPT Flex (Dark Skin Tone)
- Pre-incised Delivery Skin for ECSM - PROMPT Flex (Light Skin Tone)
- Perineum for CSM and CD&E Modules - PROMPT Flex
- Uterus for PROMPT Flex Enhanced Cesarean Section Module (Light Skin Tone)
- Cervix for PROMPT Flex Enhanced Cesarean Section Module
- Pelvic Floor for ECSM
