

Suturable Wound Closure Trainer

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SM03726

A realistic suturing experience for wound closure practice. An adjustable tension mechanism in the trainer puts upward pressure on the wound for a more realistic response. Replaceable mimetic tissue Inserts offer two suturable layers of tissue simulating cutaneous and subcutaneous skin. Overall dimensions of trainer are 9.75" x 4.75" x 2.25" with a suturing area of 8.5" x 3.5".

Although not developed for use with dermal adhesive, some adhesives may bond to the material.
