

Tactility Surgical Learning System

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SM03732

A complete training system for basic intestinal operative skills. Designed for resident training, the system enables surgical learners to perform basic intestinal operative skills and to identify technical errors in the act of performing surgery. The model, curriculum, and advanced trainer not only lend themselves to the execution of specific skills, but also to the repetition of these skills, or deliberate practice.

THE COMPLETE TACTILITY SURGICAL LEARNING SYSTEM INCLUDES:

- Anastomosis stand, tray, and patency assessment fixture
- Twelve 10 " long, 1 inch diameter, mimetic bowel tissue segments
- Surgical Instruments: 2 forceps, 3 hemostats, 1 scissors, 1 needle driver, 2 60cc syringes
- Lubricant and simulated succus entericus
- Curriculum booklet, DVD, and laminated pocket guide
- Specimen case and progress tags
- Hard plastic carrying case

Replacement Tactility Bowel segments are available in packs of 6 or packs of 12.
