

## Mutifunctional EVE Simulator for Proctology

**Price inquiry:** +48 605999769, [kontakt@openmedis.pl](mailto:kontakt@openmedis.pl)

Product code: SM03741

With the ETXY-Procto simulator the approach and removal of rectal tumors gain insights never seen before. Treat fissures and fistulas with the use of real instruments and identify cleavage planes with the endoscopic method. Perform surgeries using TEO (Transanal Endoscopic Operation), where the cleavage planes can be dissected between the tumor and the intestinal wall. Our technology provides a safe, realistic and innovative training for both physicians and students. The multifunctional base of this simulator can also be used

for hysteroscopy and endourology, with the exchange of its surgical units made of Neoderma. Components and spare parts:

- Reusable anatomical base, made of fiberglass
- Artificial vagina for surgical unit support
- Surgical unit for diagnosis of pathologies

Optional pathologies:

- Rectum with 2 polyps, 2 diverticula, and hemorrhoids
- Rectum with 1 fistula, 2 polyps, 2 diverticula, and hemorrhoids
- Rectum with 2 fistulas
- Rectum with 3 fistulas
- Rectum with 1 fistula, and hemorrhoids
- Rectum with 2 fistulas, and hemorrhoids
- Rectum with 3 fistulas, and hemorrhoids
- Rectum with 3 polyps
- Rectum with 1 fistula
- Rectum without pathologies
