

Mesocephalic Dental Dog - Teeth Set - Standard

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: MZ03810

Mesocephalic Standard Teeth Set is designed to be used with our Mesocephalic Dental Dog Training Model.

The teeth are 3D printed from resin and have a soft pink silicone gum attached. The set includes all 42 adult teeth, with incisors, canines, premolars, and molars for both the upper and lower jaw. The teeth are divided into sections to be able to be swapped in and out of our dental dog head easily with a screwdriver.
