

SIMULATOR FOR SUTURE AND DISSECTION

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: SM03873

SUTURE DISC This Simulator is a suture training model that provides dozens of suture exercises, from simple needling to nevus removal, lipoma, hypertrophic scarring, and micro sutures. In addition to that, the Neoderma® is highly retractable and can be used dozens of times without leaving stitches marks. For add even more realism, SUTURE DISC features cleavage planes and it is the only model on the market that comes with exercises on the disc and allows use on its reverse side. The STD simulator allows more than 30 exercises such as: • needling • regular suture and irregular border suture • subcutaneous flap • X, U, inverted U and V-shaped sutures • suture approach • Greek rope suture • hemostatic suture • Donati and Semi-Donati suture • intra-dermal suture and deep suture • drain placement and attachment • ureter suture • removal of cysts and nevus, foreign body and other procedures The STD simulator consists of an acrylic support and a Neoderma® suture disc with exercises. Note: Surgical instruments are not included. The parts in Neoderma® may have color variation

DISSECTION DISC Dissection Disc is highly indicated for the practice of abscesses drainage procedures, dissection and excision of tumors, cysts and lipoma. Features scar with keloid and nevus so the students can practice and develop their suture and incision skills with accuracy The Dissection Disc can be used both sides: • Side 1: Tumor dissection, lipoma, nevus, sebaceous cyst, abscess drainage, withdrawal of scar by zetaplasty. • Side 2: Flat surface ideal for incisions and sutures This model is composed by an acrylic support and the surgical unit disc in Neoderma®.
