

Canine Rectal Exam Task Trainer

Price inquiry: +48 605999769, kontakt@openmedis.pl

Product code: MZ03958

Providing veterinary medical students and technicians with a realistic animal tissue analogue to practice the common clinical skill of urogenital rectal exam.

A modular clinical physical exam skills model with quickly interchangeable prostate/urethra, rectal, and lymphatic units to accurately assess canine genitourinary rectal exam. Learners can improve their skills and validate competency on a realistic silicone model well before attempting these skills on a real patient, thus improving confidence in technique and reducing negative patient outcomes. 6 different urethra & prostate models • Normal female • Female urinary stone • Normal neutered male • Male urinary stone • Assymetric soft hypertrophic prostate • Asymetric rigid hypertrophic prostate Kit includes 2 Perineum & Rectum units

- 1 normal smooth rectum
- 1 with polyps
