

## Endotracheal intubation of the snake

**Price inquiry:** +48 605999769, [kontakt@openmedis.pl](mailto:kontakt@openmedis.pl)

Product code: MZ04015

Our realistic snake simulator has a detailed reproduction of the mouth cavity. The glottis and trachea are opened.

The endotracheal intubation processes can be practiced on the simulator. It is possible to insert tubes or alternative ventilation aids into the trachea. The snake has a heart marking "H" and a stomach marking "S" on the body as an indication.
