

## Episiotomy Simulator

**Price inquiry:** +48 605999769, [kontakt@openmedis.pl](mailto:kontakt@openmedis.pl)

Product code: SM04024

This representation of a female vulva with clitoris, labia, urethral opening, vaginal opening, anus, perineum and muscles is made of reinforced material and allows you to practise suturing birth injuries realistically over and over again. The muscles of the perineum and anus can be sutured separately from the skin. The skin pads are available as consumables and a replacement pad is already included in the scope of delivery. The included base is adjustable in inclination and allows the vulva to be brought into a natural position. Size 20x14cm, weight 0.7kg
