

## Bovine Venipuncture and Intramuscular Injection Simulator

**Price inquiry:** +48 605999769, [kontakt@openmedis.pl](mailto:kontakt@openmedis.pl)

Product code: MZ04041

The practical **veterinary simulator** for learning and training intravenous and intramuscular injections performing in cattle. The training set includes:

- **the cow head model** made of realistic and durable materials
- the tripod on wheels with the possibility of adjusting the height of **the bovine head model**

### **The application of the bovine head simulator for venocentesis and intramuscular injections:**

Due to its numerous and unquestionable advantages, a teaching aid in the form of a **bovine head model** is an ideal equipment for veterinary laboratories and labs for acquiring practical clinical skills. **The cattle injection trainer** allows to shape and develop the following skills:

- learning anatomy and locating characteristic landmarks
- learning the location of cervical vessels and their injection
- performing the intramuscular injections and ear tagging

The presented **model of a cattle head** allows to acquire practical skills before starting work on a living organism, which reduces the stress of future veterinarians and technicians, as well as the animals themselves

### **Technical specification:**

- The metal Rolling Stand
- Durable Silicone with metal armature
- Removable head for ease of transportation, and replacement of components
- Removable/washable hide covering. Can be replaced when worn

- 

Comes with 5 sets of replacement vein

## **Product features:**

### **Jugular Venipuncture:**

- 

Using anatomical landmarks, students will learn to seclude and palpate veins

- 

Endures multiple punctures and includes 5 sets of replacement veins

- 

Pressurized blood bag included

- 

Replaceable hide covering to conceal injection sites and blood draw site

### **Intramuscular Injection Site:**

- 

Well rendered anatomy illustrates injection landmarks

- 

Accepts fluid injections and can endure multiple punctures

### **Soft Silicone Head:**

- 

Removable and replaceable ears for tagging

### **Rolling Stand:**

- 

Adjustable for height, rostral tilt, 90 degree rotation

### **Replaceable parts:**

- 

Veins

- 

Intramuscular pads x2

-

Hide covering

- 

Pressurized Blood bag

- 

VSI Blood

- 

Replacement Ears

The advanced **veterinary simulators** are the future of education. We also offer other teaching aids, such as: **animal anatomical models** (cow model, mare model, pig model, sheep model, etc.). Among the virtual solutions supporting learning, a new, **advanced platform for learning veterinary anatomy** should be mentioned, enabling detailed visualization of the cow anatomy from the external integuments to the skeleton. Our wide range includes various **cattle trainers and veterinary phantoms** from proven and recognized brands on the market. The most popular **veterinary trainers** include cattle theriogenological models that allow for teaching cows rectal contraction, palpation and recognition of pregnancy as well as ovarian pathology and insemination. Our offer also includes **bovine simulators** specifically intended for learning and training insemination (e.g. Emma Cow). The most advanced **cattle veterinary simulators** include teaching aids enabling calving simulation.
