- A selected quality human skull was chosen for this model, dissectible into 14 parts: A horizontal section of the skull exposes the cranial cavity in which the course of the meningeal vessels, the venous sinuses and the internal carotid artery are indicated in color.
- A sagittal section exposes the structure of the nasal cavity including frontal and sphenoidal sinuses.
- The frontal sinus is further dissected on one side by a bony section, on the other side it is resected in its outline.
- The temporal bone is removable and sectioned into two parts presenting internal ear in full view.
- The mandible is movable and can be taken off.
- The mandible and the maxillae are opened on one side presenting the roots of teeth with dental vessels and nerves reinstated in colour.
- On the other side the maxillae can be opened.
