

## Elbow joint with ligaments with stand

**Price inquiry:** +48 605999769, [kontakt@openmedis.pl](mailto:kontakt@openmedis.pl)

Product code: MA00690

- Natural casting of a human elbow joint.
- Upper arm stump, radius and ulna.
- The ligamentary apparatus and the interosseous membrane are manufactured from elastic material.
- The model allows demonstration of the movements of the elbow joint such as flexion and extension, in addition to the rolling movement of the bones of the lower arm during pronation and supination.
- With removable stand.
