

## Human Brain, actual cast

**Price inquiry:** +48 605999769, [kontakt@openmedis.pl](mailto:kontakt@openmedis.pl)

Product code: MA00742

This Human Brain is molded and cast from an actual specimen. Custom-formulated resin and the production process permit us to represent a level of accuracy and detail necessary for anatomy instruction. The left and right hemispheres are separated, allowing for an interior view of the corpus callosum and cingulate gyrus, as well as the hypothalamus, pons, and cerebellum. Two different models available, each fits in a specific skull. Skulls not included. Fits into our male skull model 4710.
